Consistency in the Group Setting

The importance of *consistenc*y in a treatment setting can't be overstated. This is especially true when people are placed in vulnerable situations. *Inconsistency* can, at best, increase uncertainty and insecurity for the person receiving services. At worst, unpredictability can create a sense of helplessness while simultaneously decreasing a person's development of self-reliance. In fact, all human beings benefit from a dependable approach in the treatment of chronic disorders. When a person learns they can rely on consistency, they are less stressed and more relaxed. Consistency in the group setting includes the group structure, psychoeducational material, and the approach.

Each agency or facility will have different requirements – such as group receipts or paperwork – however, consistency can still include a structure similar to the following:
1. Group members pick up: a. Clip Board, b. Paper, and c. Pencil/Pen as they enter the room.
2. Group facilitator picks up the group receipts from each person in the group, and/or the group facilitator passes out the sign-in sheet for the group members to sign.
3. Group facilitator provides a Positive Group Beginning, Consistent Psychoeducational Material, Consistent Approach, and a Positive Group Closure.

Psychoeducational Groups and Crisis Event Processing (when requested)

Notes to Facilitator(s):
1. THE BASICS, *Second Edition* meets the definitions and goals of Psychoeducational Groups, Skill Building Groups, and Cognitive Behavioral Groups.
2. Group participants who have become accustomed to Interpersonal Processing Groups – as well as staff who have facilitated them – may find it a challenge to now facilitate Psychoeducational Groups.
3. Likewise, facilitators who may have followed a more lecture-style education presentation, may find it challenging to now devote at least 1/3rd of group time to specific topic discussions and interactions.
4. Both types of groups (Interpersonal Processing Groups and Psychoeducational Groups) are extremely important, yet each has different goals and structure.
5. The structure of Psychoeducational Groups, Skill Building Groups, and/or Cognitive-Behavioral Groups in no way means that there will not be *interaction* – far from it. It just means that the interactions, discussions, and exercises will be about the topic(s) of each group.
6. Facilitators *may* – or not – still want to allow time in each group for the group member(s) to discuss a crisis that may have occurred since the last group.
7. We do know, of course, that *every* person in group is typically experiencing many challenges each and every week; however, most of these incidents are often best resolved in ways other than group time where the event does not pertain to every group member.
8. Suggested responses to a challenge, problem, or crisis can also include suggesting the person contact their primary care provider; schedule a 1:1 appointment; reschedule their next 1:1 to an earlier time; or, meet with the facilitator after group to explore options and develop a plan.
9. A facilitator would, of course, not *"grade"* an event as being worthy or not for group time. If a person requests individual time in the group, then that would be accepted as valid and time allotted at the end of the group.
10. Over time, the group begins to understand the differences between a situation, a challenge, a problem, or a crisis and can make decisions to utilize group time or continue with the current psychoeducational topic.

Prepare Professionals

Suggestions for professionals to prepare themselves for group typically includes:
1. Review all content material, appendices, and/or handouts *prior* to group to avoid a lecturing style.
2. Decide beforehand the *key points* to be covered in each group to produce flexibility for group responses, discussions, or questions.
3. Gain an overall understanding of the content so summarizing is possible in order to create an interactive facilitation style.
4. Determine the group structure to achieve the essential balance between education and discussions.
5. Check group room to be sure there are enough clipboards, pencils or pens, and markers or chalk for the board.
6. Make enough copies of any handouts *before* group.
7. Write any group content on the board *prior* to the beginning of group whenever possible.

Master Guide & Master Tips to Professionals

Note: *The Master Guide* (located at the beginning of Volume I & II) and the *Master Tips to Professionals* (located at the back of Volume I) have many topics to assist in the group process like Master Tip #39: Suggestions For Managing Handouts For Groups (pages Master Tips 64-67). Other tips include:

1. Master Guide: Interactive Style (pages Master Guide 10-11)
2. Master Tip #1: Suggestions for Beginning Group (pages Master Tips 1-4)
3. Master Tip #3: Empathetic Treatment Approach (pages Master Tips 7-9)
4. Master Tip #4: Promoting Hope (page Master Tips 9)
5. Master Tip #5: Maintaining a Consistent, Nonjudgmental, and Positive Attitude (pages Master Tips 10-13)
6. Master Tip #12: Responding to Requests for Copies of Appendices (pages Master Tips 27-29)
7. Master Tip #13: Depth of Psychoeducational Content (pages Master Tips 29-30)
8. Master Tip #14: Group Closure Suggestions (pages Master Tips 30-31)
9. Master Tip #16: Motivational Interviewing (pages Master Tips 31-32)

Present Curriculum/Topic

1. It is extremely important that each group participant leave every group with more Psychoeducation than they came in with – which may also include discussing a "familiar topic" yet with a "present-day" focus. Psychoeducational Groups are designed to provide education about all areas related to the management of Substance Use Disorders and Psychiatric Disorders. Psychoeducational Groups are not Interpersonal Processing Groups – even though interaction and processing the particular *psychoeducational topic(s)* is essential to individualizing the topic(s) or skill(s) presented.
2. It is recommended that a minimum of 1/3rd of group time be devoted to interaction (therapeutic counseling *topic* discussions). This can be accomplished – depending on the individual style of the group facilitator(s) – by any "present education-interact/discuss – present education-interact/discuss" combination while still structuring the group to include the curriculum/topic education to be covered.
3. The presentation of material will, of course, be modified by the facilitator to match the functioning skills of group participants. It is important to note, however, that THE BASICS, *Second Edition* was written in a conversational language while taking into consideration a wide-range of symptom acuity and severity. Persons with co-occurring psychiatric and substance disorders benefit from learning about their disorders and how to manage them, as do all individuals with any chronic disorder(s). Each group participant will retain what is meaningful to them at the present time.

Group Beginning Suggestions

A positive group beginning (and ending) is extremely important. There are many ways to begin (and end) a group in a positive way. Suggestions to choose from can include:

1. Reading the Thought For The Day from a meditation book. (Note: Meditation books that also contain an index at the end of the book – such as *Easy Does It* – are helpful in choosing a specific reading that matches the topic(s) presented in group like Self-Esteem.), or
2. Reading an inspirational or humorous curriculum handout from THE BASICS, *Second Edition*, or
3. Practicing a deep breathing or a stretching exercise, *or*
4. Sharing of one thing that each person is grateful for today, *or*
5. Sharing of one positive thing that he/she did that contributed to their recovery in the past few days, or
6. Reading an AA Slogan with a brief explanation or AA/NA/Dual Recovery inspirational reading.
* Recommended Beginning: Breathing Exercise (located on page Master Tips 3)

Practice Curriculum/Topic

Practicing subject material is the best way participants can internalize and personalize the curriculum content. Practice includes the group interactions, worksheets, exercises, handouts, and content discussions.

Moving Toward Abstinence & Making the Decision to Change
Volume I; Subject Three; Pages: Subject 3-67 – 3-74; Appendix III-101 – III-102

Based on a 2-Hour group: Two 50 minute segments	Time-Frame
Group Beginning	**20 Minutes Total**
Positive group beginning (suggestions are located on the previous page).	5 Minutes

1. Brief Group Introductions: (Note: The *interactions* in a psychoeducational group are discussions about the *topics*, not inter-personal processing or case management questions which do not apply to the entire group.)
  a. Ask the group members to tell the group their name.
  b. Welcome any group members who are new to this group or phase.
2. Crisis Processing (when requested and optional):
  a. Ask the group if anyone has experienced a crisis since their last group, and if they need/want additional time in this group to discuss it, i.e. what happened, how they managed the crisis, and/or explore options and develop a plan.
  b. Let the person(s) know that you will allow time at the end of this group for them to share their experience and receive support from their fellow group members.
	10 Minutes
<u>Summarize Introduction of the Group Topic and Why It's Important (page Subject 3-67)</u>: For many people abstinence might very well be the best decision and the safest choice. This is because over the long run they would lose nothing or little by it, where "cutting back" leaves the danger of runaway addictive behavior. People with co-occurring Psychiatric Disorders benefit the most by a program of abstinence. For example, a person with a Borderline Personality Disorder finds that sobriety equals safety. Using the safety frame also helps to avoid endless arguments about whether a person is "really" chemically dependent or not, since most can argue that using substances has not been and is not likely to be a safe option for them (Evans & Sullivan, 2001). Today we will talk about moving toward abstinence and the goals along the way. We will also discuss the areas of recovery so you can each talk about the progress you have experienced and the areas you want to focus on in the near future.	5 Minutes

Psychoeducation Part I: Topics & Focus	Pages & Location	Presentation Suggestions	Time-Frame
Moving Toward Abstinence	Subject 3-67	Summarize second paragraph (the first paragraph is the introduction on the previous page).	30 Minutes
Choosing to Make The Decision to Change	Subject 3-67	Summarize two paragraphs.	
Putting Off The Decision	Subject 3-67	Summarize one paragraph.	
Making the Decision	Subject 3-68	Summarize three paragraphs	
Management of Psychiatric Disorders By Reducing Substance Abuse	Subject 3-68 – 3-69	Summarize three paragraphs.	
Treatment Does Work!	Subject 3-69 – 3-70	Summarize six paragraphs.	
First – Become Willing to Learn	Subject 3-70	Summarize one paragraph.	
Treatment Is About Learning	Subject 3-70	Summarize brief paragraph.	

To the Group:
1. What comments do you have?
2. How do you personally relate to this information?
3. Where do you see yourself at this point – today – in making a decision to change? Not Sure? Not Ready? Ready? In Between any of these?

Break			10 Minutes

Psychoeducation Part II: Topics & Focus	Pages & Location	Presentation Suggestions	Time-Frame with Crisis Processing	Time-Frame without Crisis Processing
Not Picking Up The *First* Drink or *First* Drug	Subject 3-70	Summarize two paragraphs.	10 Minutes	15 Minutes
Learning to Say "No" – Learn, Talk, Think, Practice, Say It	Subject 3-70 – 3-71	Summarize two paragraphs.		
Planning for Specific Situations	Subject 3-71	1. Summarize one paragraph. 2. Summarize information in table.		

4

Psychoeducation Part II: Topics & Focus (continued)	Pages & Location	Presentation Suggestions	Time-Frame with Crisis Processing	Time-Frame without Crisis Processing
Second – Become Open-Minded to Suggestions	Subject 3-71	1. Summarize two paragraphs. 2. Summarize the three points in table below:	Continued ⇩	Continued ⇩

Get rid of alcohol, drugs, and paraphernalia.	Limit contact with people who drink or use other drugs.	Protect yourself in situations where you have a strong urge to use drugs.

Third – Have a Plan For Different Situations, Before They Happen	Subject 3-72	1. Summarize paragraph. 2. Summarize or name five points in the table below:

1	Give yourself permission to walk away.	4	Recognize the importance of pre-planning.
2	Get support whenever possible.	5	Have refusal lines ready.
3	Call a supportive person.		

Fourth – Get Support From Group	Subject 3-72	Summarize two paragraphs.

Skill Building Exercise and Discussion - Suggestions for topic discussion:	Time-Frame with Crisis Processing	Time-Frame without Crisis Processing
To Facilitator(s): 1. This time will give participants an opportunity to discuss *each* area of recovery in more depth. 2. This more in-depth information is located in Appendix III on pages III-101 – III-102. 3. As the group discusses different areas, use the information in the table about each area of recovery to provide additional education and elicit interaction. **To the Group:** 1. All areas of a person's life *are* or *will* be eventually affected by an untreated disorder in a very negative way. 2. That means in the recovery process a person will eventually see the positive benefits in these same areas.	20 Minutes ⇩	25 Minutes ⇩

Skill Building Exercise and Discussion - Suggestions for topic discussion: continued			Time-Frame with Crisis Processing	Time-Frame without Crisis Processing
Areas of Recovery	Subject 3-72	1. Summarize one paragraph before and after the table shown below. 2. List the seven areas of recovery from the table shown below.	Continued	Continued
1	PHYSICAL RECOVERY.	4	SOCIAL RECOVERY	6	FAMILY RECOVERY
2	MENTAL OR PSYCHOLOGICAL RECOVERY	5	LIFESTYLE RECOVERY	7	SPIRITUAL RECOVERY
3	EMOTIONAL RECOVERY				

3. Of these areas – which area(s) of recovery are you noticing a change in? Physical? Emotional? Family?
4. Which area(s) are you hoping to see additional changes in with continued recovery?
5. What steps are you currently taking to see that these positive changes happen? Examples?
6. Good for you!!!! Keep up the good work!!!

Group Closure	Subject 3-74	Summarize one paragraph.		
Benefits of Treatment	Subject 3-74	Summarize one paragraph.		

Crisis Processing	Time-Frame
1. Ask the group member(s) to tell the group what happened. 2. Explore options and/or develop an immediate plan for coping. 3. Allow the group to offer support.	10 Minutes

"Paper Work"	Time-Frame
Group participants fill out Group Notes.	5 Minutes

Group Closure	Time-Frame
1. Read a daily brief meditation for the day, *or* 2. Ask each group member to name something they are grateful for today, *or* 3. Ask a group member to read aloud an inspirational reading or message of your choice.	5 Minutes
