

Evidence-Based Practices – What everyone needs to know!

The Foundations of the Recovery Process

Monday, July 25th

First, integrated treatment is recognized as evidence-based practices and is a national priority – even a requirement. This workshop will begin by briefly establishing EBP in the areas of System, Program Design and Guidelines, Clinical Practice Content, Approach, Relationship, and integrated treatment of the Person with co-occurring psychiatric and substance disorders.

Secondly, EBP states that co-occurring psychiatric and substance dependence disorders are *brain* disorders in biologically vulnerable individuals. A brain disorder *focus* then logically leads to a brain healing *treatment*.

FACILITATOR: Rhonda McKillip, M.Ed., LMHC, MAC, CCDCIII, CDP is an international trainer and author of “THE BASICS, Second Edition: A Curriculum for Co-Occurring Psychiatric and Substance Disorders” foreword by Kenneth Minkoff, MD. Ms. McKillip is a member of the international Motivational Interviewing Network of Trainers (MINTie), and a NAADAC Approved Education Provider. Ms. McKillip provides national onsite technical assistance, program development, consultation, and individual or group training on Dual Diagnosis and Motivational Interviewing in the agency setting. For more information: rhondamckillipandthebasics.com or contact Rhonda McKillip at rmckillip@ix.netcom.com or 509-258-7314

All chronic and acute medical disorders begin with stabilization of the affected organ of the body. It's commonsense that the treatment of a broken leg starts with a cast and not a cane. And that *approach* is *consistent* from provider to provider.

The organ of the body involved in stabilization of dual diagnosis is the *brain*. Consistency of the treatment of co-occurring disorders is critical – just as it is in *any* profession. This workshop details the *foundations of the recovery* process of co-occurring disorders that are vital in the stabilization phase of integrated treatment.

Come join us for an atmosphere of hands-on & how-tos. Let's collaborate on how to literally put THE BASICS (evidence based practice) to use in your specific treatment program.
